

Rowan-Virtua SOM Programmatic Level Educational Objectives

- *Provide programmatic level educational objectives for the osteopathic medical education program.*

Programmatic Level Educational Objectives

- I. Students will acquire and apply scientific knowledge, encompassing biomedical and clinical sciences, research literacy, and osteopathic philosophy to improve health care.
- II. Students will demonstrate compassionate, effective, holistic, evidence-informed, equitable, and osteopathic patient-centered care.
- III. Students will demonstrate professionalism with integrity, accountability, equity, ethical practice, cultural humility, and respect for patient autonomy.
- IV. Students will effectively communicate and interact with others within the scope of their professional roles in both health care and academic environments.
- V. Students will integrate evidence, feedback, and self-reflection to adapt behavior, foster improvement, and cultivate lifelong learning.
- VI. Students will apply knowledge of health systems, resources, and structural and social determinants of health to optimize high-quality care for patients, communities, and populations.
