

STEP Review Process

A student's progress in meeting competency and testing benchmarks is reviewed multiple times across their four years of medical school.

Step 1: Assessment reviews all student's data & identifies students for STEP review based on criteria

Step 2: STEP reviews students & puts forth suggestions and/or requirements

Step 3: Students are notified of the committee's suggestions, requirements, or referral to SAPC for formal remediation

Step 4: Students complete any requirements set forth by the committee

Step 5: Students submit progress report prior to next review
